

### **Remarks/Arguments**

In this response, the Applicants are amending the claims as suggested by the Examiner, and thus it is requested that a notice of allowance be mailed. All of the withdrawn claims have been canceled. Claims 31-39 and 51 are pending.

The Examiner has rejected claim 33 for reciting the term "substantially." This term has been deleted from claim 33. Nevertheless, as stated in the office action, it is well known and accepted in the relevant art that standard XRPD characterization of a compound inherently involves a small amount of measurement variability, on the order of about  $\pm 0.20$  degrees  $2\theta$  for each peak. Accordingly, a person of ordinary skill in the art would understand that any recitation of XRPD peaks will include at least  $\pm 0.20$  degrees  $2\theta$  variability for each peak.

The term "Epsilon" has been added to claim 53 as requested by the Examiner.

Claims 54 and 55 directed to compositions and methods of use have been canceled.

As such, this application now includes claims that have already been deemed allowed, or which have been amended as requested by the Examiner.

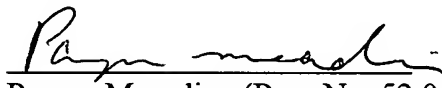

### **CONCLUSION**

Applicants respectfully submit that the present application is now in condition for allowance. The Examiner is invited to contact Applicants' representative to discuss any issue that would expedite allowance of this application.

Respectfully submitted,

KENYON & KENYON LLP
